

DRYING IRONERS

MCM 2500 2800 3200 Ø 500

 **imesa**

MCM LINES: WHEN DETAILS MAKE THE DIFFERENCE!

The MCM ironer has been designed to satisfy the needs of hotel, restaurants, retirement homes, hospitals and any other facility which needs fresh cleaned and ironed linen.

Models **MCM 2500**, **MCM 2800** and **MCM 3200** are all available with electrical, gas or steam heating and in four different configurations: standard, with motorized exit, with folding system and with feeder.

This product has been carefully studied in each detail, so the 50 cm diameter IMESA Drying Ironer assures high quality results and the maximum safety for the user.

Studied to last: a reliable structure and high quality components! We are proud of our product reliability in which we trust so much to grant the best warranty condition: **24 MONTHS TOTAL WARRANTY!**

High customer satisfaction!

No other drying ironer in the market offers a result comparable with IMESA MCM results!

Thanks to the double ironing belts and to their particular configuration, the marks on the linen, typical of drying ironing, are a problem of the past. The MCM series assures high quality results, very similar to those of a chest ironer. The belts wrap 87% of the roller diameter, in this way it is granted a very high hourly production.

The old problem of black stains on the linen is eliminated thanks to the special protection on the temperature probe.

The ironer models MCM RE, MCM PF and MCM FE are all equipped with a double ironed linen exit. At any moment, the user can choose to collect the linen at the front or rear exit. In the second case the ironer become a "through machine" and the laundry process is sped up; one or two operators work at the front of the ironer, one or two operators work on the back to cross fold and store the ironed linen.

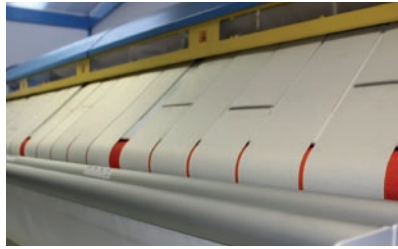

WORKING WITH THE MAXIMUM SAFETY

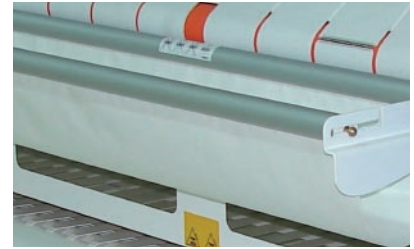

The **TWO EMERGENCY STOP BUTTONS**, one on each side, can be easily reached if needed to immediately stop the ironer.

The **HAND SAFETY BAR** protects the user for any accidental pulling of an art inside the ironer.

The **PROTECTION WINDOWS** below the introduction table allows the control of the folding process without any risk for the user.

STEAM HEATING: working with steam, safety is really important. Each IMESA steam heated drying ironer is sent with its own **97/23/CE PED certificate**.

GAS HEATING: the roller of the gas heated ironer has been designed to grant heating uniform throughout the entire length of the roller. Due to the special heat circulation inside the roller huge energy savings are realized.

GOST CERTIFICATE:

IMESA drying ironers are respecting the Russian Federation manufacturing standards.

Do not waste time and energy!

SAVE IN ENERGY AND MAINTENANCE

The cooling key on the keypad activates the Cooldown function: the heating stops, but the ironer continues to work using the thermal energy accumulated by the ironer. When the temperature goes below 80°C the ironer turns off by itself.

This function allows the use of energy that otherwise would be lost and also reduces wear and tear on the ironing belts.

In MCM and MCM RE version the electronic control allows to manage:

- Start/stop of the drying ironer;
- Ironing speed in meters/minute;
- Ironing temperature;
- Cooldown.

EVERYTHING IS UNDER CONTROL

Any error signalled during the ironer operations is displayed and stored in the microprocessor memory. The ironer is equipped with a working hours counter. This information can be easily retrieved by the technician during the service operation in order to assist in finding the correct diagnosis and solution.

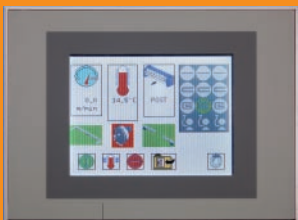

AUTOMATIC SPEED/TEMPERATURE COMPENSATION

Thanks to this function the drying ironer automatically chooses the most suitable ironing speed in function of the temperature. In this way the user work is easier and high quality results are always assured.

SAVE YOUR OWN IRONING PROGRAMS!

Once the linen most suitable parameters are chosen, the program can be saved, named and recalled again in the future when needed. In case of folding system and feeder equipped ironers the program considers not only the ironing speed and temperature, but also the type of fold.

The version MCM PF and MCM FE are equipped with a huge touch screen which allows to manage:

- Start/stop of the drying ironer;
- Ironing speed in meters/minute;
- Ironing temperature;
- Cooldown;
- Fold configuration;
- Feeder activation;
- Suction on the introduction table;
- Exit side.

IMESA:
ADDING VALUE
TO YOUR JOB!

STANDARD VERSION

The MCM ironer is characterised by a strong structure, index of high reliability. Thanks to its compact dimension, the Drying Ironer can be installed against a wall minimizing space requirements. The drying ironer is equipped with a table to help in the linen introduction and with a collecting table for the exiting linen.

**MCM
SERIES:**

**IRONING
MADE EASY**

FRONTAL/REAR MOTORIZED EXIT

Thanks to the motorized exit, in case of working peaks, the rear exit can be activated in order to make the laundry process more fluid and increase the ironer hourly production.

The drying ironer is equipped with a big table to make the linen introduction easier and with two collecting tables, one for each exit. When the exit collecting table is not used, it can be pulled against the machine, saving space.

**MCM RE
SERIES:**

**OPTIMIZING
THE
RESOURCES**

MAIN FOLD

The model MCM with folding system makes the user free to schedule the work following his needs:

- Possibility to work on one or two independent lines;
- Possibility to configure the kind of fold: single, double or no-folds. Thanks to the optic fibres, the microprocessor recognizes the linen length and when to activate the air blades to fold the linen.
- Possibility to choose at any time the front or rear ironed linen exit.

**MCM PF
SERIES:**

**VERSATILITY
AT YOUR
DISPOSAL**

FEEDER

Thanks to the automatic feeder just one user can iron and fold linen of large dimensions.

To make the introduction easier, the drying ironer is equipped with a big table where the user can put the linen so it does not fall to the ground. Once the linen is fixed using the feeder pliers, it is automatically introduced into the drying ironer to be collected at the exit perfectly ironed and folded. The user can choose at any time if the linen must exit on the front or rear side.

**MCM FE
SERIES:**

**SAVE IN
MANPOWER**

IMESA: A LIFE BY YOUR SIDE

Imesa is a leading company in the production of laundry equipment. We achieved this goal thanks to more than 40 years of total commitment to the continuing challenges to satisfy the growing technological expectation of human beings and meetings changes in lifestyle.

Innovation, quality, safety, versatility, service and reliability: IMESA success is based on this six concepts. Innovation in technology and proposal. Quality guaranteed by an UNI EN ISO 9001 certified production system. Safety of products certified by qualified operational organisation in various part of the world. Versatility and flexibility which allows many possibilities of customisation. Reliability thanks to the solid product structure.

Customer satisfaction is IMESA main achievement. Thanks to an international and professional net of distributor and to a well trained service net, IMESA can assure a global service in Italy, in Europe and in all the world.

During the offer step, IMESA distributor offers a complete support in the correct equipment choice and complete the job with a financial analysis of the investment as well as with the project.

IMESA can deliver in a very short time thanks to **equipment stock** in many countries: Italy, Spain, French, Portugal, Algeria, Hungary, ...

The wide **service** net can assure a quick **technical assistance** in case of necessity and the **spare parts can be easily purchased** in IMESA official website.
